webReader Keyboard Accessibility

More information on access keys can be found in the Help tool, which can be accessed from the webReader toolbar or using Modifier + I. Access keys are activated with modifier keys, which differ depending on the browser and operating system used, see https://en.wikipedia.org/wiki/Access_key. Access keys do not need to be capital letters. Depending on the implementation of webReader, some features might not be activated.

When the user has set focus on the player, **tab/shift+tab** can be used to navigate and the **enter key** to activate a certain button or option.

To access a feature, use Modifier + Access Key	Access Key
Listen button: put focus on Listen button	**K**
Start reading: put focus on player and start the reading	**L**
Stop button: put focus on the stop button	**X**
Move Listen button: put focus on the drag handle of the Listen button, player, and toolbar (LMSs only, not all LMSs)	**U**
Pop-up Control Panel: put focus on the first button on the pop-up control panel (usually the Pause button)	**C**
Open/close toolbar	**1**
Settings	**S**
Reading Language (toolbar must be open, to choose a language)	**R**
Click and Listen	**H**
Enlarge Text	**E**
Text Mode	**V**
Page Mask	**M**
Download mp3	**D**
Help	**I**
